

Simple Available Flexible

Artologik EZbooking – always providing you
with the latest booking data

New version
4.0

- Web based
- User-friendly
- Functional

Artologik EZbooking:

the online booking tool
for optimised use
of resources!

Artologik EZbooking is the web based booking tool which helps you create order amongst your bookings. You get a quick overview of the occupancy for the different objects and can say goodbye to unwanted double bookings.

Easy to use
EZbooking has a user-friendly interface which makes it easy to work in the program.

Adjust the system according to your organisation's needs and demands
EZbooking is very flexible, which in turn means great adjustment possibilities.

Limit what the users can book – and when
The program's authorisation settings make it possible for you to decide which objects the users can book, at what time – and what cost.

Decide which calendar view you wish to display
The program lets you choose which of its six different calendar views should be available for the users and which information you want it to contain.

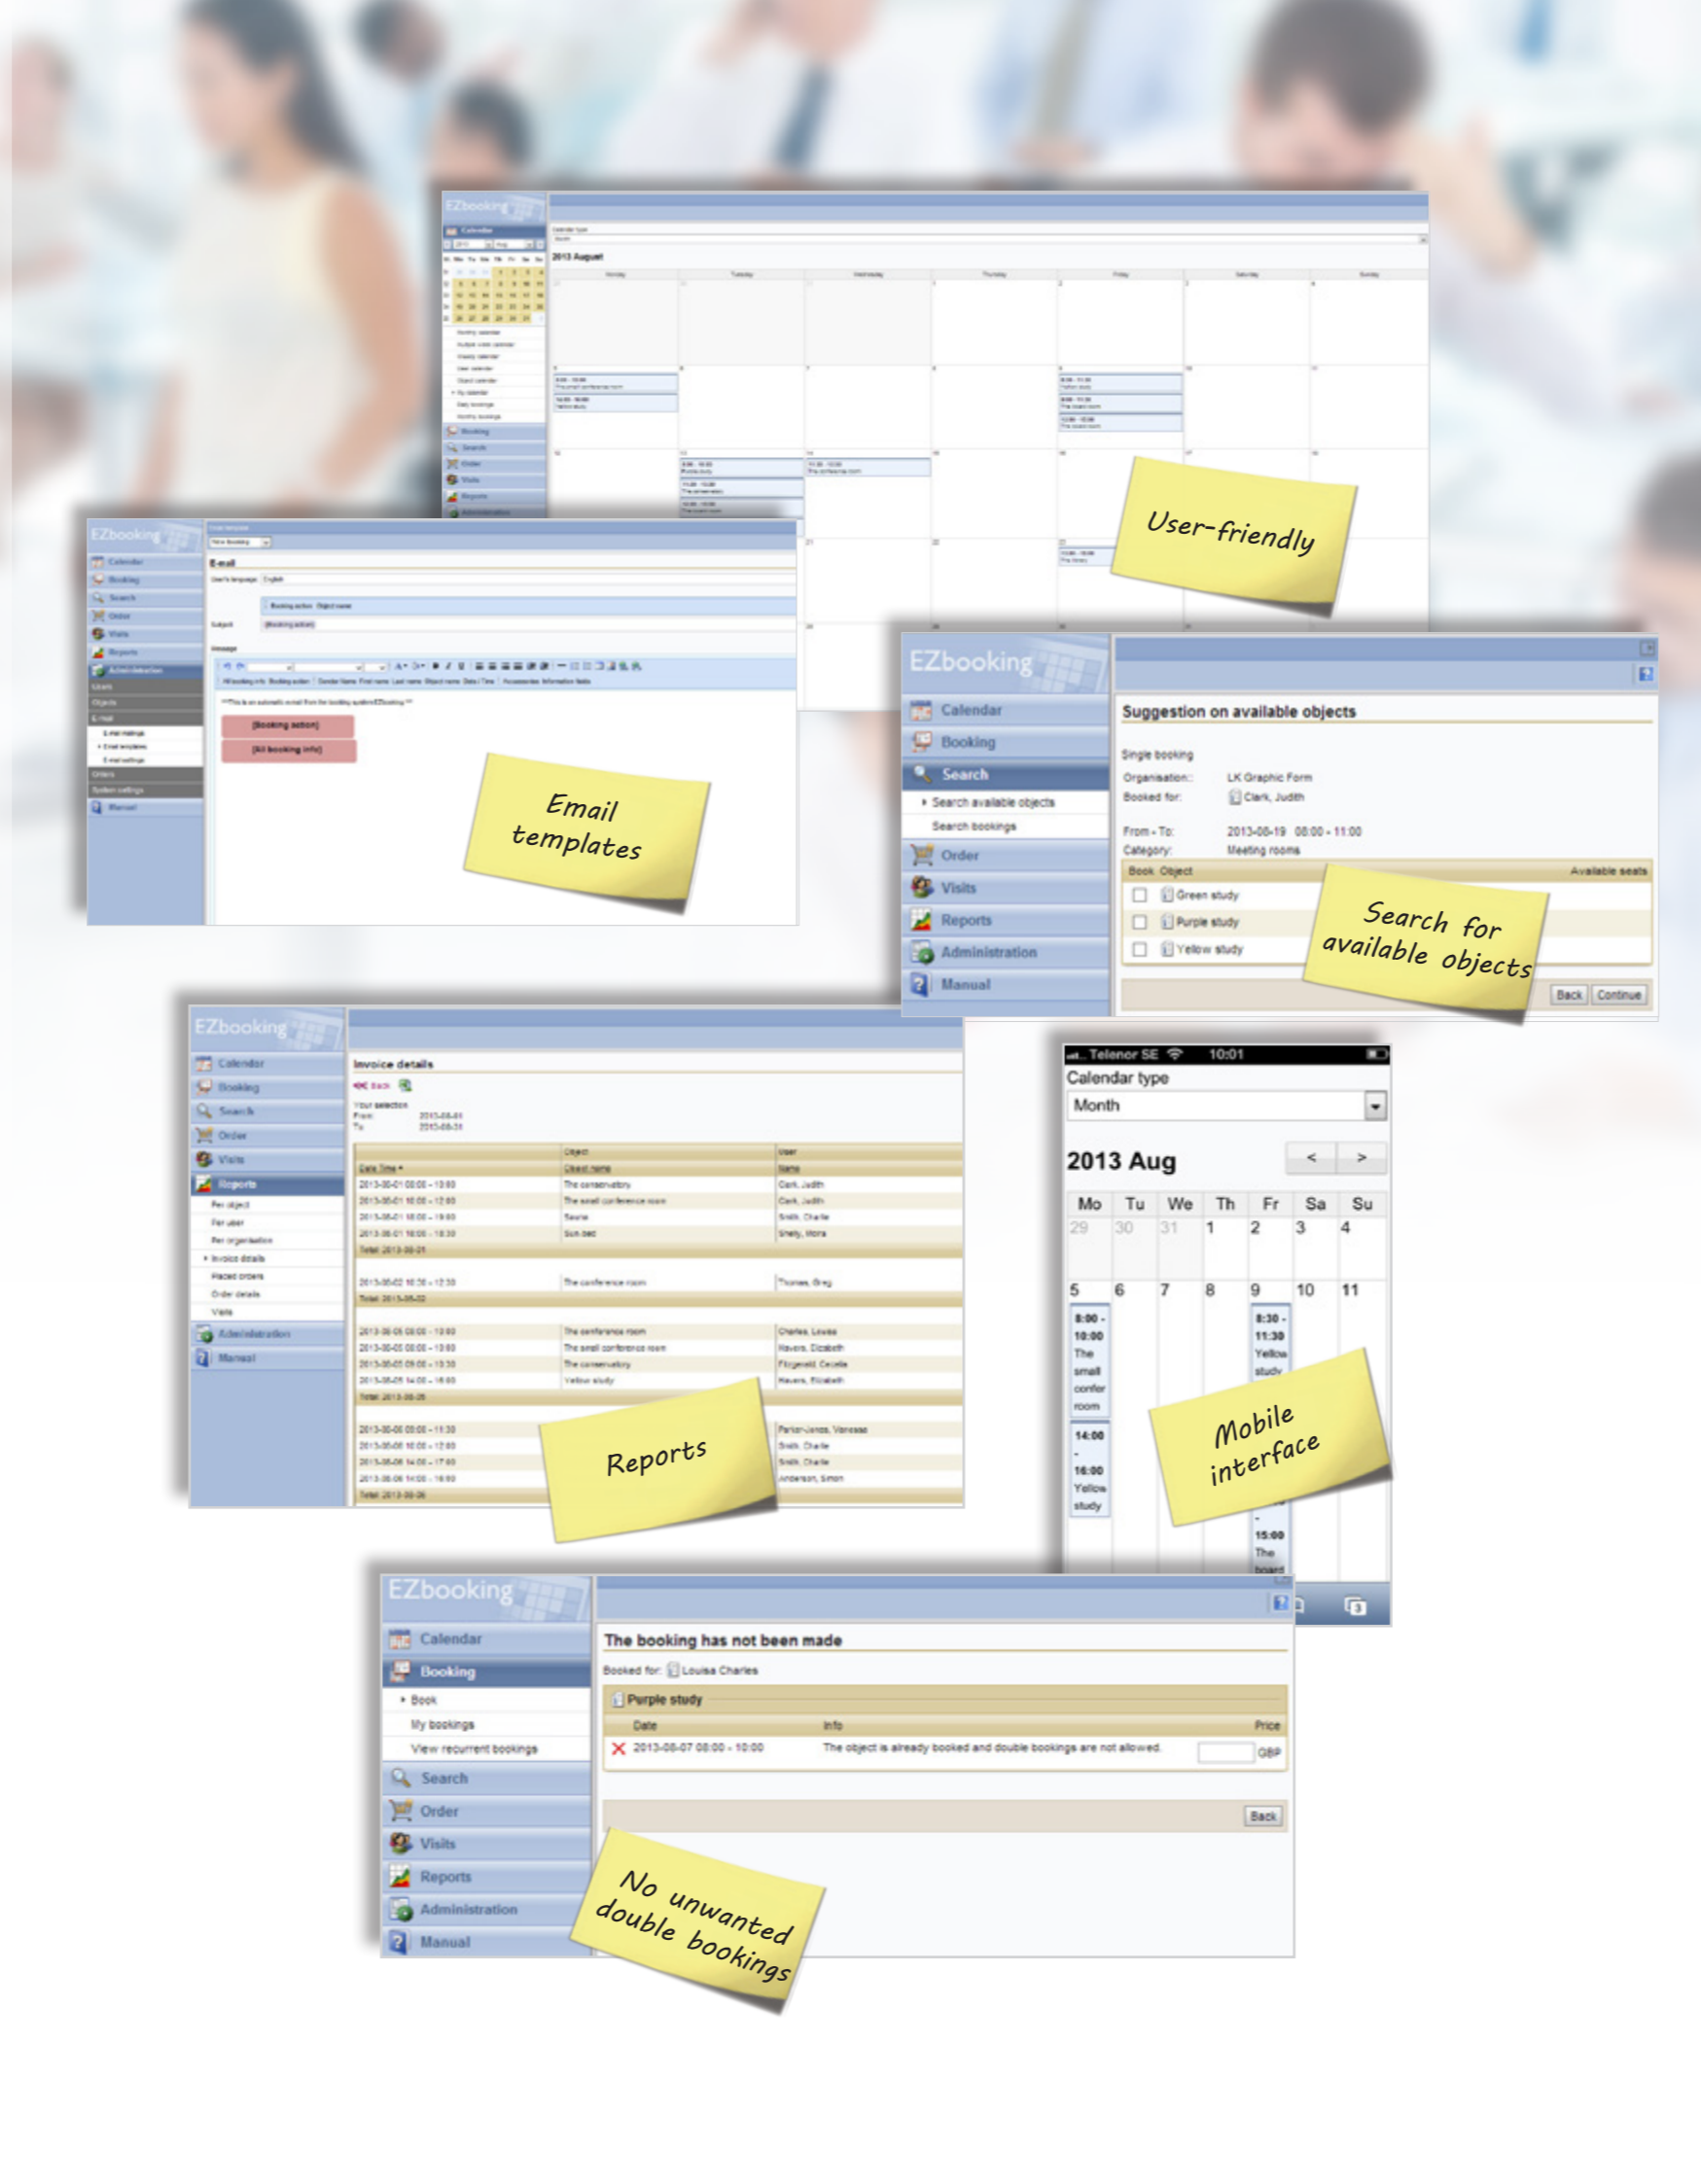

Book – wherever you are
EZbooking is not only web based, but also has a mobile interface which means you can make your bookings wherever and whenever.

Smart search function
The EZbooking search function allows you to search amongst available objects as well as bookings in a simple way.

Email function
The program's settings menu lets you decide if you want emails to be automatically sent to the users. These emails could contain booking information or reminders, for example.

Export bookings to an external calendar
It is easy to export bookings to your Outlook calendar, or any other external calendar supporting the iCalendar format.

Informative reports
With only a few clicks you can create reports containing, for example, basic data on utilisation degree and invoicing.

Adjust EZbooking to suit your needs even further

In order for you to be able to adjust EZbooking to suit your needs in the very best way we have developed plug-ins which can be added to the program. This lets you create an even more efficient booking tool.

EZ-Equip
Booking extra equipment

Need to book a projector for the meeting in the conference room? With the plug-in EZ-Equip you connect extra equipment to your objects; a trailer can become bookable with the company car and a projector with the conference room.

EZ-LDAP
Catalogue service
With our LDAP connection you make administration, handling and user validation an easier process and eliminate double administration since user information is automatically updated. It also lets you create a user environment with single-sign-on.

EZ-Order
Order module
Coffee and cake for the afternoon meeting, or pens and paper? Order it directly from EZ-Order, separately or in connection with the booking. You can easily extract lists with information for specified time periods, i.e. for internal debiting.

EZ-Visit
Visitor registration
This plug-in lets you register guests and visitors separately or in connection with the booking. The front desk will then know who to expect and can also print visitor badges directly from the program.

General information about the program

Technical requirements

If you rent the program all you need is a web browser. Technical requirements for a licence purchase can be found below.

Web browser

In order to make bookings you need Windows Internet Explorer 7.0, 8.0, 9.0 (PC) or Mozilla Firefox 3.0 or later (PC and Mac).

Rental licence

When renting the program we take care of the management. The program is placed on Artisan's server and therefore you do not have to consider the technical requirements below.

Purchase licence for installation on your server

Web server

The program is installed on a web server which must meet the following requirements:
Operating system: Windows Server 2003, 2008, 2008 R2

Web server program: IIS6, IIS7, IIS7.5
Other: CGI, ISAPI and .NET Framework 3.5 SP1 must be installed.

Database

The program works towards any of the following database servers (databases):

Microsoft SQL Server 2005, 2008, 2008 R2, 2012

Microsoft SQL-Express

Licence sizes

The Artologik programs are available in different sizes. The size that suits you the best depends on your organisation and its complexity.

Available sizes

Light: Suits a smaller company, or a department within a larger organisation. The maximum number of users is limited to 25 and the number of objects to 10.

Standard: For the smaller company or organisation, or a department within a large organisation. The number of users is limited to a maximum of 50 and the number of objects to 20.

Enterprise: Suits larger companies and organisations. The number of users is limited to a maximum of 200, and the number of objects is limited to 50.

Global Edition: This licence is unlimited in terms of users and objects.

Support and warranty

The Artologik products are easy to use but questions may still arise. We recommend that you buy a service agreement when purchasing our software, which includes free telephone support. (Read more below.)

When purchasing an Artologik program you always have a one year warranty, counted from the invoice date, regarding promised functions. You can also purchase a service agreement that runs on a yearly basis. There are service agreements for both the program and its plug-ins. See complete price information on: www.artologik.com

Service agreement:

- Always access to the latest version
- Free access to phone support
- Free access to online support
- Free help via our helpdesk within one working day
- Warranty for promised functions
- Upgrade warranty to bigger licence – only pay the price difference

Prices for service agreement – Annual basis

Rental licence EZbooking

Service agreement is included.

Purchase licence EZbooking

Light:	150 €/year
Standard:	300 €/year
Enterprise:	450 €/year
Global Edition:	900 €/year

Training

In order for you to get started with the program quickly we offer training sessions. Choose between half day or full day. Modern technology enables us to also have training online.

See www.artologik.com for further information.

More information

You can read more about EZbooking and our other programs on www.artologik.com. There you can also order a personal trial site! You are of course always welcome to call, fax or email us at Artisan Global Media at any time.
