Artologik®
SOFTWARE FOR THE WEB

Artologik TIME

from beginning to end

TIME turns the process of time registration into an easy routine, which everyone will quickly learn to use and appreciate. You register directly on the web – at any time and where ever you are.

Easy to learn and easy to use

The program is entirely web based, flexible and intuitive. Using the mobile mode, you easily access the program from tablets and smart phones as well. The program is so simple that your users will get started within five minutes.

Simple registration

Register time, products, external services and travel costs as it fits you; per day or week. The program also has a timekeeper function for those who often switch tasks during the working day. You can specify if verification is required before the registrations can be displayed on invoice and salary details.

Project management

The convenient administration will still get you lucid project information. Connect members to your project and state the time frame. The application makes it easy to calculate with different cost and price models.

Customized reports

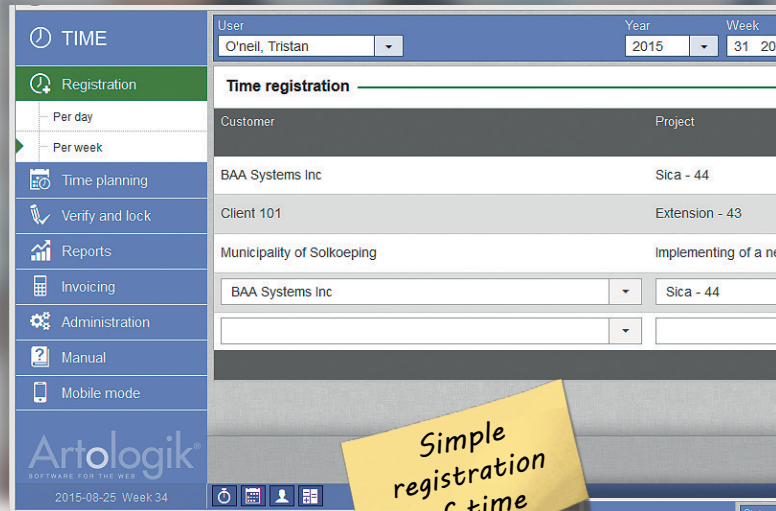

The starting point for your report can be a time period, a project, salaries or a result. The application gives you great possibilities to compose the report content according to your preferences. Gather your favourite reports under one, single tab and you can easily make sure that the projects keep pace with the planning. Using the result report, you can compare outcome and planning in detail.

Invoice details and invoicing

Registrations are collocated in the invoice details. Decide how much information you want to present on the invoice. Register payments and search in the invoice journals. If you do not want to use the entire invoicing module, export opportunities exist from several steps in the process.

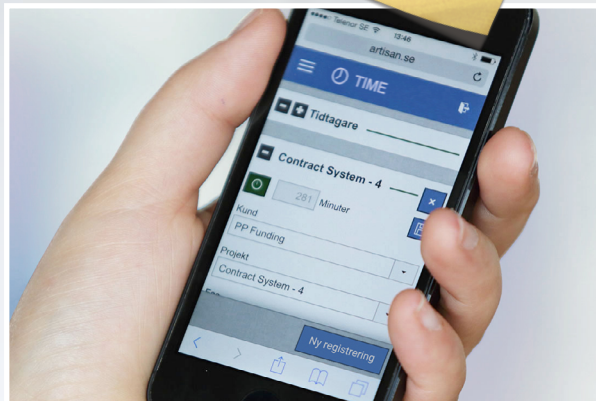

Administration

A large number of setting possibilities makes it possible to adapt the system to your business. Calendars keep track of normal working hours, holidays and leaves. Different directories handle customers and suppliers etc.

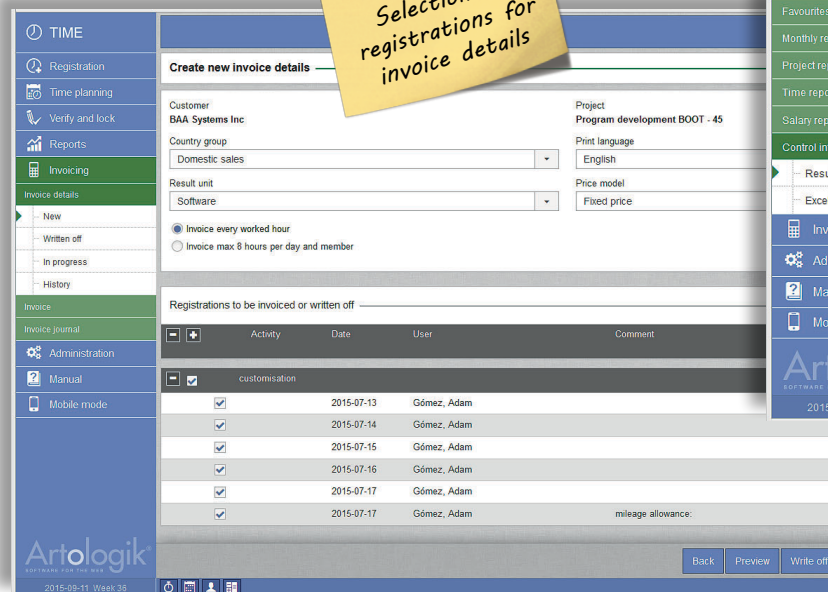

Simple registration of time

Adapted interface for mobile phones and tablets

Selection of registrations for invoice details

Adapt

TIME to suit your needs

Different plug-ins make it possible to adapt TIME to suit your organisation.

TIME-LDAP

Service directory

A connection to a directory service (such as Active Directory) means that all users' information is automatically read from a central directory. Double administration is avoided and information is easily updated. Using our LDAP connection you can create user environment with a 'single sign-on'.

TIME-Flex

Flexitime management

TIME-Flex makes it possible for the co-workers to keep track of their flexitime, compensatory time and overtime. TIME-Flex gives the accounting staff the possibility to generate detailed overviews of who is to receive overtime payments.

TIME-EcoSync

Integration with economy software

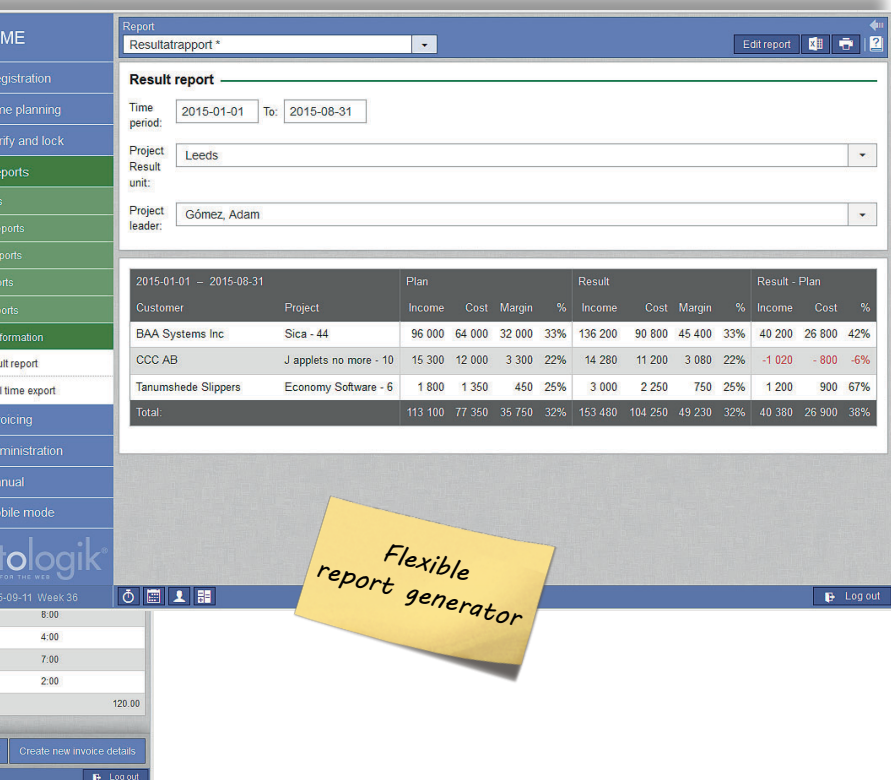

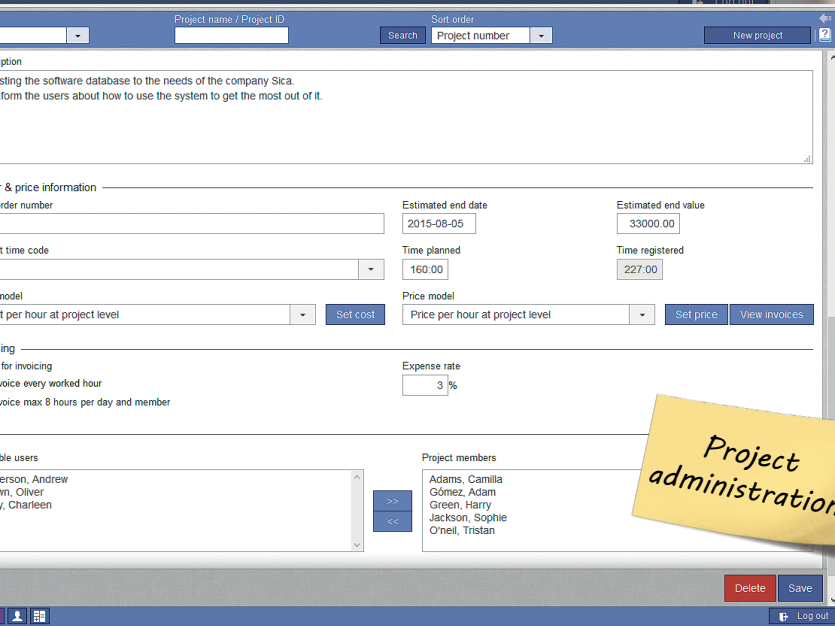

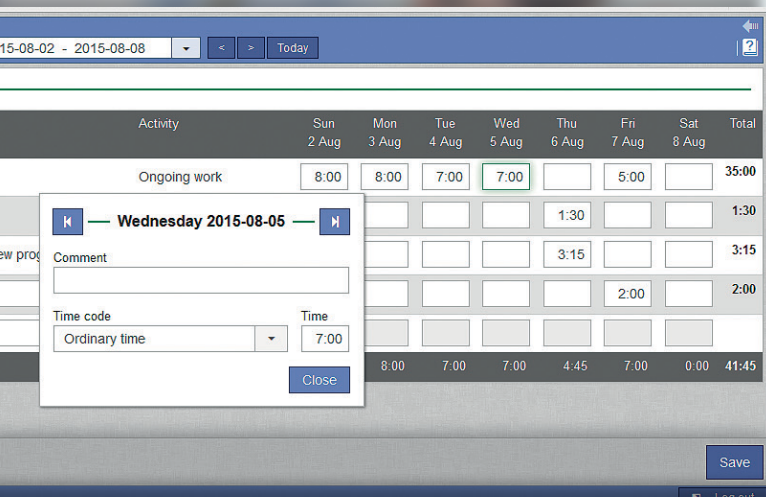

TIME can be integrated with different economy software, using the plug-in TIME-EcoSync. This plug-in enables you to synchronise customers, projects and items, as well as to generate invoices automatically into the economy software. We adapt the plug-in to the process flow of your organisation and the economy software. A ready-made solution exists concerning VISMA Administration 1000/2000 and XOR Compact.

TIME-Salary Export

Export of salary details to a salary software

You can export salary details from TIME to salary software. The details can also include traveling costs and other expenses. The export is made in different formats depending on the salary software. Today export files are available for SIE4, VISMA and Hogia Salary.

Read more about TIME and its plug-ins on www.artologik.com

General information about the program

Technical requirements

With a rental licence a web browser is the only thing you need.

Web browser

(Applies for both rental and purchase customers.)

- Windows Internet Explorer
- Mozilla Firefox
- Google Chrome

Rental licence

The easiest way to use the software is renting it and letting us take care of the hosting. Since the software is installed in the Artisan data centre, you do not need to consider the technical requirements below. The modern Artisan data centre is situated in Växjö where we manage and take care of the maintenance ourselves. We keep high security and guarantee 99.9% accessibility.

Purchase licence for own installation

Web server

The software is installed on a web server which has to fulfil the following requirements:

Operating system:

- Windows Server 2008 (32- or 64-bit operating system), 2008 R2, 2012 or 2012 R2

Web server program: IIS 7 or later

Installations:

- CGI, ISAPI and ASP.NET
- .NET Framework 3.5 SP1
- .NET Framework 4.0

Hardware:

- Hard drive space: 10 GB
- RAM: 2 GB

The Web server must be able to connect the SQL-server using OLE DB and ODBC.

Database

The program works towards any of the following database servers/databases:

- MS SQL Server 2008 or later
- MS SQL-Express (limited SQL server)

MS SQL Management Studio must be installed to handle the database.

Hardware:

- Hard drive space: 4 GB
- RAM: 4 GB

Licence sizes

The licence size regulates the maximum amount of active users. There are no other limitations and the different editions have identical functionality.

Choose between the following sizes:

Light: Maximum of 10 users.

Standard: Maximum of 20 users.

Enterprise: Maximum of 50 users.

ExtraPack: It is possible to increase the Enterprise licence with 10 users at a time.

Prices

Rental licence TIME

The set up cost is 190 €. A rental licence includes free technical support and updates.

Rental

Light:	80 €/month
Standard:	160 €/month
Enterprise:	270 €/month
ExtraPack:	40 €/month

Purchase licence

Light:	750 €
Standard:	1 500 €
Enterprise:	3 000 €
ExtraPack:	750 €

Plug-ins

PM-Flex	Rent	Purchase
Light:	30 €/month	500 €
Standard:	60 €/month	1 000 €
Enterprise:	90 €/month	1 500 €

Light:	15 €/month	230 €
Standard:	60 €/month	1 000 €
Enterprise:	90 €/month	1 500 €

Integration

PM-EcoSync	350 €/year
PM-Salary Export	350 €/year

All prices are excluding VAT. All prices are subject to change. For an updated price list, please see www.artologik.com.

Support and warranty

Artologik TIME is easy to use, but questions might still arise. If you come across technical questions concerning the program itself, you can search for solutions in our Helpdesk FAQ on <https://helpdesk.artologik.com>.

When purchasing Artologik software you always have a one year warranty, counted from the invoice date, regarding promised functions. To you who purchase a licence for own installation, we give an installation warranty meaning that we will redeem the program should it not work in your environment.

Service agreement:

- Always access to the latest version
- Free access to telephone support
- Free access to online support
- Free help via our helpdesk within one working day
- Warranty for promised functions
- Upgrade warranty to bigger licence – only pay the price difference

Prices for service agreement (yearly)

Rental licence ProjectManager

Service agreement is included in the rental fee.

Purchase licence TIME

Light:	150 €/year
Standard:	300 €/year
Enterprise:	600 €/year
ExtraPack:	150 €/year

Training

In order for you to get started with the software quickly we offer training sessions. Choose between half day and full day, distance or face-to-face, either at our place or at yours. Read more on www.artologik.com.

Do you wish to learn more?

On our web site www.artologik.com you can find further information about the software. There you can also order a free trial site. You are always welcome to call or e-mail us at Artisan.
