## Object administration

---

### Category as heading and search argument in the object list

Under the *Administration > Objects > Objects* menu, the objects are now listed with information about which category they belong to. You can click the *Category* heading to sort the list by category, and what you type in the *Search text* field also matches category names that contain the specified search text.

Search text  
cars Search active

**Objects**

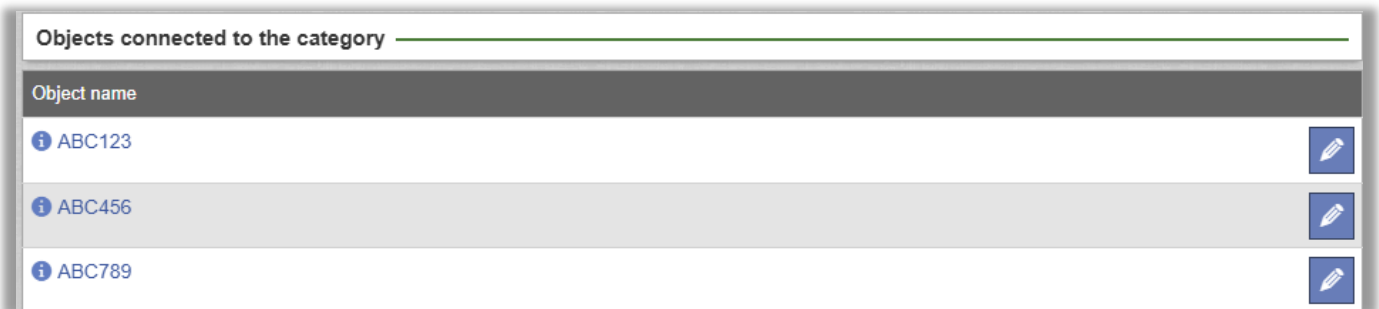

There were 17 matching results.

Object	Category
<a href="#">ABC123</a>	Cars
<a href="#">ABC456</a>	Cars
<a href="#">ABC789</a>	Cars

### Shortcut to the objects from the category administration

When you edit a category, objects connected to the category are listed. Now you can directly from the list:

- Click the object name to get information about the object
- Click the  button to go to the administration of the object

**Objects connected to the category**

Object name

<a href="#">ABC123</a>	
<a href="#">ABC456</a>	
<a href="#">ABC789</a>	

## EZ-Project

### Export project information to Excel

For customers with the EZ-Project plug-in, it is now possible to export all information about the projects to Excel. You will find the button at the top right of the program window after selecting the *Administration > Projects* menu.

The file will present all the information contained in the Project Administration page, each field in an own column.

- The fields that contain more than one piece of information will present each one on an own row. For example, if several users are selected as members, each will appear on one row of their own.
- The fields that only contain one piece of information will present that information on each row created for the project.

	A	B	C	D	E	F	G	H
	ID du Projet	Nom du Projet	Catégorie de Projet	No. de Projet	Chef de Projet	Membre de Projet	Classe de Prix du Projet	Le Projet peut être sélectionné pour
1								
2	3	Project 2027-2029	Physics	PHY123	Adam, A.	Maria, M.	Level 1	Laboratory A
3	3	Project 2027-2029	Physics	PHY123	Adam, A.	Sven, S.	Level 1	Laboratory B
4	3	Project 2027-2029	Physics	PHY123	Adam, A.	Lina, L.	Level 1	Laboratory C
5	3	Project 2027-2029	Physics	PHY123	Adam, A.		Level 1	Laboratory D
6	18	Project Biology - 2028	Biology	BIO876	Clara, C.	Ebba, E.	Level 3	Laboratory B
7	18	Project Biology - 2028	Biology	BIO876	Clara, C.		Level 3	Laboratory D
8	18	Project Biology - 2028	Biology	BIO876	Clara, C.		Level 3	Laboratory Z

## LDAP

### New settings for automatic LDAP import

Import of users via LDAP can be scheduled on the server. In this release, the import can be configured so that only new users, i.e., users not already present in Artologik EZbooking, are imported. This is achieved by setting the parameter `USER_IMPORT_ONLY_NEW` to the value 1 in the file `AGS_LDAP_CMD.ini`.

There is also a new setting to control the automatic import so that only users who meet certain criteria are imported. The example below shows a command that results in importing users whose surname begins with the letter a:

```
AGS_LDAP_CMD.exe STARTPOS=0 MAXREC=5000 FILTER="(&(objectClass=*)(sn=a*))"
```

## API

### Get information fields via API

Users with API rights now have the ability to get information fields connected to an object via API. It is also possible to get, insert and update information fields of bookings.
